ClassQuest

What is ClassQuest?

ClassQuest is a browser-based classroom gamification platform designed to increase student engagement by transforming school work into an interactive role-playing experience. Built for upper elementary and middle school classrooms, it allows teachers to convert assignments, quizzes, and exams into structured quests and boss battles that reward effort.

Why ClassQuest Is Needed?

- Students show low motivation and frequent off-task behavior in traditional classrooms
- Existing tools fail to sustain engagement beyond short interactions
- Learning often lacks immediate feedback and visible progress

Evidence:

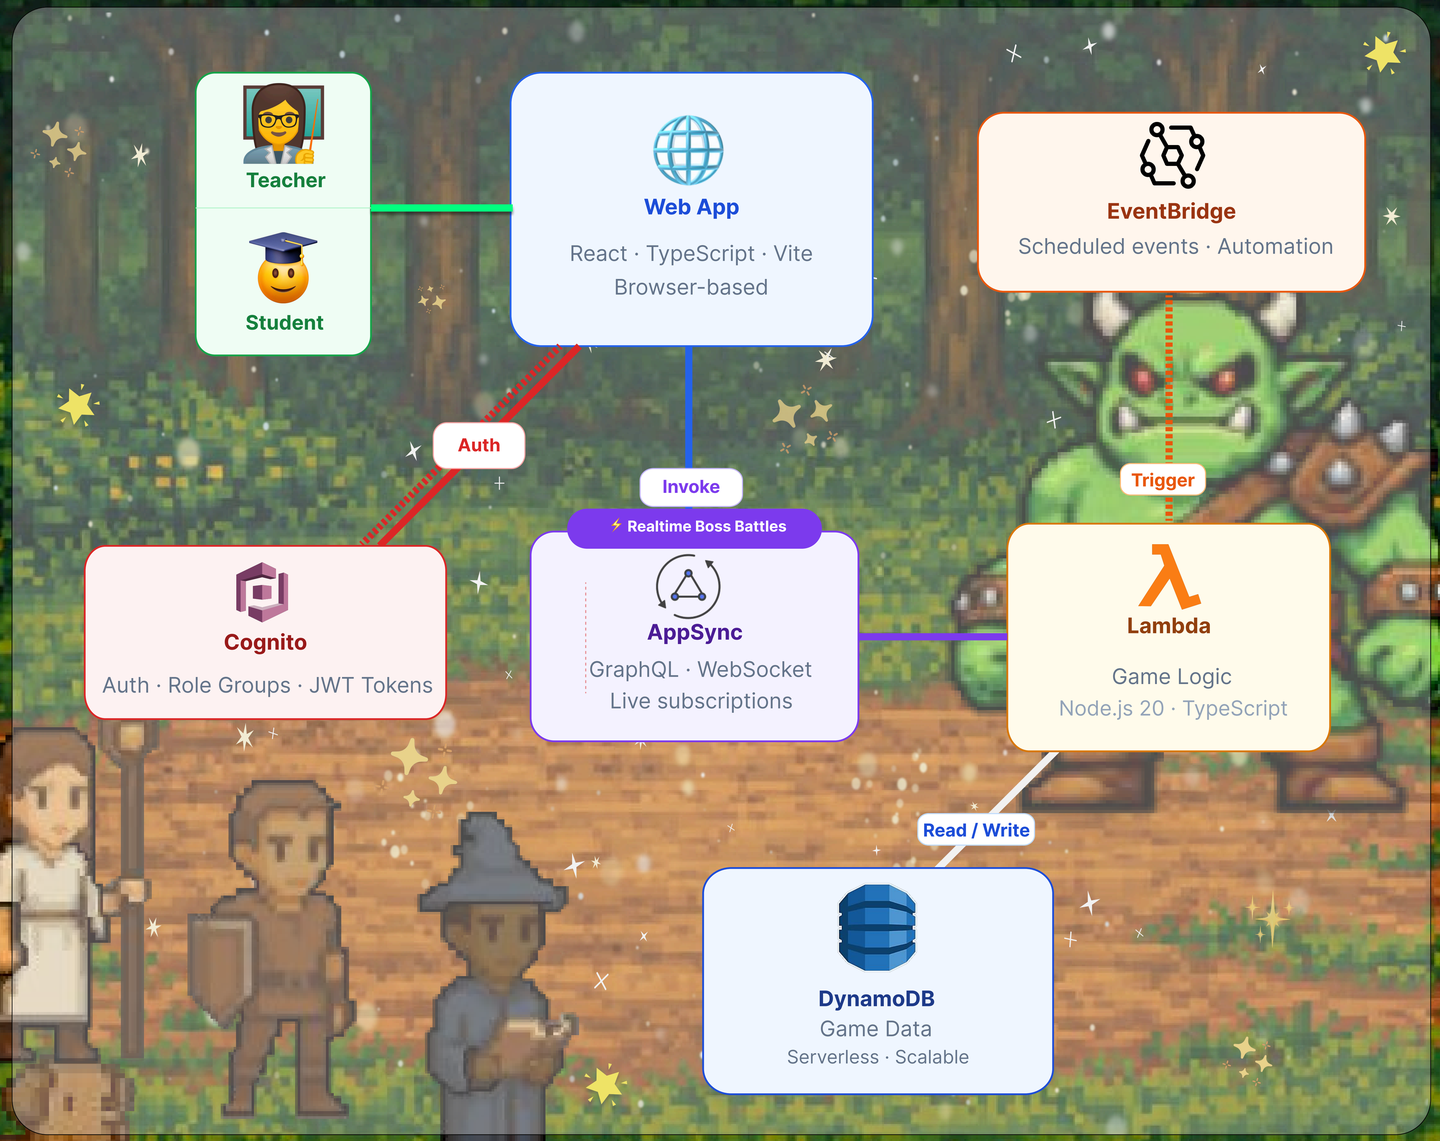
- 85% of students play video games regularly

Gamification improves motivation, engagement, and academic success

Impact

- Increases classroom participation
- Improves task completion
- Encourages collaboration

Aligns with UN SDG 4 – Quality Education



Key Features

- Quests System
  Assignments become structured missions with clear objectives and rewards
- Boss Battles (Core Innovation)
  Real-time, guild-based assessments where students collaborate to defeat shared challenges
- Guilds (Team Mechanics)
  Students work in teams to promote accountability and cooperation
- Progression System (XP, Gold, Hearts)
  - XP → leveling and progression
  - Gold → cosmetic customization
  - Hearts → performance feedback
- Avatar Customization (Vanity Gear)
  Reinforces motivation through identity and ownership
- Flexible Assessment Control
  Auto-grading (MCQ, TF, Matching) + manual grading (short/essay)

How It Works (Flow)

1. Teacher creates or selects quest
2. Students complete tasks → earn XP, gold, rewards
3. Major assessments become live boss battles
4. Students contribute answers → affect shared outcome
5. Progress tracked in real-time via GraphQL
